I was playing in a server last night, and was on teamspeak with the people on my team. The guy Deasniper was getting amazing headshots with a SBH, and I was a 500 almost every time. He gg'd 3 500's without dying. We all said he was using \*cheat name removed\*. Anyways he was banned, then he threatened, to have me Banned On Site. Then Irashiva came and started talking shit to so I took screen shots of it. Can anyone tell me what the hell this is about? Or if this is really going to happen.
