I completly recoded, to use GDI+. I'm going to offer a download soon, you can use it connect to my server. you don't need to set any settings just connect.

The server has no delay programmed in, so i am not releasing that. My server has one slot on it so you can join, run around etc. teamchanging is allowed. There is a bug, that makes it CPU hungry, i'm still trying to fix this.

More infomation will be over <http://forums.dcomproductions.net/viewtopic.php?p=109#109>
