spreegemIf their behind bars don't kill them :rolleyes:

They are behind bars before the battle, but they will attack you during the battle if you don't kill them. Worse, the visceroids, also behind bars before the battle, will actually heal Petrova.

But I found Petrova really easy...it took me just about 30 seconds to kill her with the laser rifle, and I took only about 50 damage...and this was on "Commando".

Now Raveshaw was a real b*tch, must have taken me 7 or 8 tries to kill him. :oops:
