I will give you instructions:
First click file.
Second Click Export.
Third select where you are going to save it to.
Fourth Select W3D.
Fifth click export.
Sixth if it is terrain click terrain otherwise I you will have to wait tell I get home and can look up what the other ones name is (its going to be the top on the left, check the collisions box, if it has an animation check the one below).

If you really need pictures just ask.
