@cmatt42:

Have you got any error message for me? Or even better - a crash dump?

Additionaly, there is a bug in scripts up to version 3.2.1, which will be fixed in 3.2.2 (a bug which occurs more often when Resurrection is used, and that's not my fault )

Unfortunately I don't, and I don't remember what the error was either. I copied my Renegade folder to test it with great optimism, but when it failed to load, I deleted the folder. As for the issue with the scripts- I'll try it again when 3.2.2 is out.
