i'm on level 60 with 200 archers, and yeah they do there job at level 50+ the men that are attacking run across the screen in a second, and a wave of 5 giants 5 suicide bombers come, everytime they die the next wave of 5 comes. Though I have 800 repairmen 250,000hp castle so when they hit me my life doesn't even budge. Going on level 61 with a 12,000,000 highscore, about 1,000 converts, 6mill in spending points, and of course 60,000 casualties.
