I like to play ren, because in this game I have a good chance of winning: Some days i can barly even shoot, i just cant move the mouse fast enough and there is fuck all I can do about it. On days like that I cant hit a fucking thing unless it just happens to stand still. Not that it bothers me.

I can blow up buildings. I can drive tanks. I can win games. So can many others just like me. I wouldnt bother with planetside.
