syncourts I'm no good at programming or anything. I really need some sort of program ready made to decrypt it for me(if that is the right file). They have a program for battlefield 1942 that you can enter cd-keys into the file and when you need to change them you just double click the key you want and it enters that key into battlefield.

Im too busy at work to try and figure out what kind of encryption it use's, so i can't help you out there, sorry
