Well you can always download the full directX installer from microsoft ->
http://www.microsoft.com/downloads/details.aspx?familyid=4B1F5D0C-5E44-4864-93CD
-464EF59DA050&displaylang=en

It's a bit bigger as it updates more than just the parts scripts.dll needs, but it brings up fully up to date with DirectX.
