---

just a little info  
me as a good sniper on field (love that map) has taken out tons of techs trying to repair in field  
i've stolen stanks, flamers, light anything they try to repair in field  
if you get out allways, and i mean allways keep moving, don't repair near the waterfall, because a  
simple soldier can hop in your veh like that  
try to repair near the bunker, or behind the little hills
