No problem. By the way, I'm not sure if it's happened to me since then, but according to my IRC logs, my client chat logging somehow turned itself off when I installed scripts.dll 2.7.0. Just in case, remember to hit F8/~ and type "log 1" to definitely enable logging. You can also type "logp", which will just tell you whether logging is on or off. Thanks jonwil for telling me about those console commands last year
