danpaul88 wrote on Sat, 28 April 2007 18:21 Did you use the installer, or get the files from the zip archive? If you didn't use the installer you probably need to update your directX setup to work with the new scripts, which you can do using this setup program ->

(Does 3.2 even have an installer yet anyway? )  
Yes, 3.2.1 have already an installer with built-in DX setup.
