danpaul88 wrote on Mon, 30 April 2007 06:59You don't need to install perl, I was simply asking IF you had it installed.

Someone else had this problem once before, and we never figured it out... I suspect it's something to do with the server's setup that prevents brenbot from loading.

That someone else might've been me...You said that BRenBot takes a while to load up and to just wait...
