Straight from the retards mouth:

Quote: Troopr02's Bio

Real Name: Damir B.

Age: 16

Sex: Male

Location: Ottawa, Canada

Hobbies/Interests: I love 0wN1nG at C&C Renegade and Web/Server Management. I also like to skateboard, I'm semi-pro and I hope to acquire a sponsor in the near future. I am also a semi-pro snowboarder in the winter and a Certified CASI Instructor.

Renegade Background: troopr01's uncle from Austria received the full release of C&C Renegade before the North American release date, and I required it from him. He installed it at his house, and we both played our first ever map there (Glacier). We were just using an MRL to attack the ob, no one was really doing anything consider it was new at this time and no exceptionally good players existed. Anyway, we got MVP that game and I got hooked so I took it home and we played in the same server while talking over the phone. This time I got MVP again, (Walls) and I remember being a lot better than everyone in that entire server (at this point I was playing 1st Person, no skins were available, and I didn't know how to even take a SS) which got me thinking about how far I could take myself with this game. I soon after realized I apparently had a natural talent for Renegade, and eventually ended up joining the +ILL+ clan which also first got me thinking about playing for more competitiveness instead of just fun. I was the #1 sniper in the clan, one of the highest ranked players on WOL, and an overall recognized player. In any case, +ILL+ was the best clan out there at that time, until it died, and that's when [+TRPM+] was born. And I have sworn in the past that I will be the last Renegade player in all of the community, even after everyone has left, and that's exactly what I plan to do.

Basically he is full of shit.

It has to be said though that once you realize what it's all about, his special brand of "logic" is quite entertaining.
