danpaul88 wrote on Thu, 29 March 2007 06:10 You probably already have, but if you haven't make sure the cable between the monitor and the PC is not loose, and use the thumbscrews to make sure its in properly and does not get knocked loose.

Also check the cable for any cuts, nicks etc. If possible try an alternative cable.

I know its a bump,
but i made this topic, got grounded, got my computer back, now the monitor works....

Heh, yay for luck?
