icedog90 wrote on Fri, 11 May 2007 04:06: Actually, a 15,000 RPM hard drive would perform slower than a 10,000 drive in those circumstances. A 15k drive has faster seek times yes, but because of how desktop access patterns are, having a drive like that wouldn't benefit a gaming system. They are suited for servers.

For more info,
