.thu is a temp file, it can be deleted. But it is most likely not the problem why your new maps arent working.

It should work if you do it like this:

1. Download the map.
  2. Unzip the map, or copy it to the following dir:
  3. Look for the dir C:\Westwood\Renegade\Data
  4. The new map should have a extension with .mix
  5. for example. C&C\_River\_Raid.Mix
  6. Copy this map into the data folder, load up Renegade.
  7. Select the map in the list and add it to the rotation.
