JPNOD wrote on Sun, 13 May 2007 14:42.thu is a temp file, it can be deleted. But it is most likely not the problem why your new maps arent working.

It should work if you do it like this:

1. Download the map.

2. Unzip the map, or copy it to the following dir:

3.Look for the dir C:\Westwood\Renegade\Data

4.The new map should have a extension with .mix

5.for example. C&C_River_Raid.Mix

6.Copy this map into the data folder, load up Renegade.

7.Select the map in the list and ad it to the rotation.

change 3. to: C:\Program Files\EA GAMES\Command & Conquer The First Decade\Command & Conquer Renegade(tm)\Renegade\Data if you are using TFD
