EvilWhiteDragon wrote on Sun, 13 May 2007 15:41 The stupid thing of Reborn is that I played a working version back in summer 03 or 04, that basically looked prettymuch finished, but needed balancing. Now it's near summer 07 and still no sign of a release anytime soon.

So, sorry, but you've lost atleast my trust in a release any time soon, if you're going to release it anyway.

Before i left the community near the end of november (i think it was) i remember them saying something about a release around new year...5 months after their promised release...nothing.
