That's an outdated version of Mixer. You should use the most recent version (1.45) included in the XCC Utilities straight from the XCC homepage.

This archive contains XCC AV Player, XCC Editor, XCC Mixer, XCC MIX Editor and XCC TMP Editor. They're put together because they depend on each other.

XCC DLL Pack

You might need these DLL files. For safety reasons, put them in the same directory as the program.
