---

my problem is everytime i try to open gamespy it crashes and says...

'the connection to the chat server was closed or timed out... gamespy cannot continue etc'

if u click reconnect after 2 secs screen appears again.

I have reinstalled twice.

manually uninstalled... deleting keys etc. Then installed.

used older versions...

and still it happens, randomly started doing a week ago and just never stopped.

Dont suppose anyone has a clue what to do... i sure dont.
