I made this about an year or two ago, never really got it shown to anyone expect to a few people who downloaded it from me.

The video was made with gameplay by myself in the Ultra and Uber Renegade Servers from [www.mp-gaming.com](http://www.mp-gaming.com)

This was my second video that I made, its nothing fancy.

The video did have A good intro and credit at the start and end of the flim, but I had to remove them as I had to resize the video the hard way.

Anyways, free free to watch it, say what you may, but enjoy it because its Renegade.

I let people try to guess the soundtrack for a while, unless you already know it.
