## UPDATES

I ain't got an "edit"-button up there, so I will add this here=

1st, it's not SSAOW1.51 I was told. It's a tiny modded 1.5 and does not claim to be v1.51.

2nd I've forgotten the new project from BlackIntel= BIATCH, the serversided anticheat solution. This is an Addition to the FDS which has to be installed and it's got several Routines in. I can't describe it well, so check the website=
