theplague wrote on Sun, 03 June 2007 04:15oh, who wants to see my huge d3d error log after CP2 installation? (might be just 7.54 rar'd, but it's really 1.9mb's)

open ren->blank screen, and still, can't find master servers.
If you had installed scripts 3 or higher before installing, then CP2 replaces the scripts.dll and bhs.dll - file with an older version. Reinstall scripts 3 or higher or delete 3d8.dll from your renegade dir.
