there are WAY more programs that run on windows than mac so I don't know what the hell your argument is based on.

I got my PC 4 years ago with XP, this year I upgraded to Vista. It kicks ass. Best OS ever! Mac can't touch it. It's everything XP was plus everything Mac is, making it SUPERIOR!

But, truthfully, both OS work great. It's only idiots who say "MAC>WINDOWS" or "WINDOWS>MAC" (but I'd just like to put this out there: there's usually more people saying "MAC>WINDOWS" than people saying "WINDOWS>MAC" so mac users are idiots, ha!). Windows has the advantage of being more widely used, but Mac should be catching up with their crazy advertising schemes and ipod and all that

I think my IQ fell about 10 points after reading this.

then I guess it's now in the negatives.
