One time on walls flying a stealth balckhand placed a beacon behind the GDI barracks and then they threw a timed C4 next to the beacon, they died and then four enggy's started to disarm it but the C4 blew and they were all killed. But I was an enggy and I kept my distance so when they died, then I came up and disarmed it and then the beacon was disabled and I stopped it with 2 sec to spare. To bad the game ended 1 sec after that because of the time limit.

LOL yeah but its also possible 2 disarm a ion cannon beacon at 0 SECONDS YES ZERO! but for nukes...doesnt work cuz of the falling nukes (btw it has hp if u look)
