Reborn wrote on Thu, 07 June 2007 20:46He included credits in the readme, I don't see the problem.

Thanks reborn.

I mean, that's what turbo squid is for right? People like argon put thier models up on turbo squid for people to download and use. I gave him the credit he deserves. Plus, this project gave me vital knowledge of the character model system in renegade.

*edit* I would be happy to help anyone with gun models. It is really easy when you figure out how to do it.

Thanks,
Jamie
