I was playing the boat mission and I got lost at the beginning. I saw a bunch of Black Hand guys coming wave after wave through a locked door. I waited and was able to pass through the door during the next wave of guys. I did not have a key for the door but I was able to get through it anyway.

I then went and completed a bunch of objectives. All of them counted except for killing the caption. I got the sub key long before I got any of the other keys. Now at the end of the level EVA is telling me to go get the sub key I already have. I am stuck next to the sub with the prisoners.
