CaptkurtCpo64Captkurt3000 feet is the same as 914.4 meters.

You said this, but now you say this?

Captkurt900m is way too big for a Renegade map.

I don't understand :S

(Edit: Did you think I meant 900 Miles? )

No, I said, 3000' X 3000' feet is too big, 3000 feet is too big, even in one direction, but then you or someone else asked me what 3000 feet was in Meters, so I said 914.4m. Then some one else or you said, they could remember 900meters easier like that was what they were going to build their

I get it now, I am being stupid, so, in meteric the largest map you should make would be about 250000 square meters?
