NightRegulator BETA 7 has been released!

New features include: Rec Ladder, Game_info + player_info reporting, as well as a security bug and updated RG code to allow people to reconnect without game interruptions.

New commands include:

!nick - Searches the IP database for a certain nickname

!ipage - Ignores pages from the user

!unipage - removes players from the list

!rstats - takes recs and medals from one player and gives to another - useful if a player changes their ingame handle

!addrec - gives a certain player x ammount of recs

!delrec - takes away x ammount of recs from a certain player

!suspect - Marks the player as a suspected cheater and places them in a special anti-cheat mode (BIATCH feature)

!trust - Removes the effect of the !untrust command

!istrust - Returns whether the player is trusted or not
