Okay, so I was told you could make numerous powerups and give it the Teleport_On_Pickup script and set it up differently every time for random teleporting. This seems pretty easy to setup but I have one question, can I Add powerups to the list or do I have to do like Ai Bots and just Mod existing presets to my liking? If I have to Mod, then when I make different modifications to the presets for different levels do I just put the C&C_mapname.ddb (rename to .gm) in the Server/data folder and it'll work when that level loads? Because I want certain settings to apply only on certain levels etc.
