No theres a new glitch not many know about, I cant say on public forum, but testing on all maps it seems to work 8/10 times, I caught a guy doing it and asked him to keep doing it, I then labeled it as obby walk and tried it myself to see if it really works, and yes, the new method works 10000% better than jumping back when obby fires..not many people know which is good, but most know obby walk isnt allowed, so they dont do it.
