Heres 2 things

1. 1000 char take down: buy any 1000 char loaded with c4 pickups or a beacon and take a hit and live with 50 health and luckily somehow pull it off.

2. new method where obby doesnt even touch you yet charges continuously for some reason never firing even though you are actually 100% visible the entire "obby walking" time.

usually i try the 2-3 1000 char rush while 1 plants ion/nuke and other 2 defend it.
