Dutch Neon wrote on Wed, 27 June 2007 00:29 Maybe a noob questions, but how to change it? ( i know theres a page on ren with scripts above 3, but im using 2.9.2 )

I'm afraid the Antialiasing settings are 3.2.x only I think.

You should still be able to manually force AA in Catalyst or nVCpl, depending on your graphics card.

puddle\_splasher wrote on Wed, 27 June 2007 00:49 O!!! For us noobys WTF does that all mean? All what? The scripts? The Antialiasing? The green cheese?
