ok i put the M09.ldd in the M09.mix

now it works everything is there

but it is this super lagy you can barely move
i couldnt leave the room and i kept going back to the place i was at

the lag only happens this map and none of the others

and i got ssgm

and i copied the objects.ddb in the mod folder to the server data folder and took out the old one
and renamed the one i just put in objects.gm
