VS 1's sucks anyway, and show in no way skill. Also, the fact that you host, does give you the advantage of: choosing team, map and no lag whatsoever. Also, you could limit the bandwidth towards the other player, and thus make it impossible for him to play.

thats exactly why players like you while be no where near players like me. btw, im not he best either, I have lost a few games against people who play more 1vs1's than me. If thats your excuse for nod playing me, that im gonna limit your bandwidth so you lag so I can bet you, you host. Your the host, your side, your map. Deny this and well, theres nothing more I can say to make you stupider. Even if I did host, there wouldn be no lag. I hosted for mine and alex's game, I told him, the second you lag, tell me and Ill work something out (diff serv), he didnt say a thing  
If you want a game, I'll consider it once it's 3 vs 3 or so. (I hope you got enough friends for that)  
As said, I think 1 vs 1 suck, so why would I even bother? Because some 12 year old called Trooprm02 calls me a dodger otherwise? (LOL) Like I care about that.
