First off, I think you mean ratio. A ration is something that they eat in the military.

I'd like to see how you fair in a 1v1 game of APB, bitch. Then you can't accuse anyone of hacking
because all of the respectable players don't hack.

I dislike 1v1 games, they don't prove anything apart from the fact that you destroyed the other
guy's base quicker. Try getting an MVP *6 or something on a 35+ player server. Then you'll have
something to brag about.
