arghh i found out what mostly screws me up after having renguard... the core patch! i didn't download them now it runs perfect again...and when i installed core patch some weird stuff alrdy happens to my game...for example the words on load screen for multiplayer all gone (like the tips... about engineers, c4, MCTs, etc), now i reinstalled without core patch the words are there again and i never experience game auto-quits...for now so what affects my game mostly i think is the core patch 2nd my skins 3rd still mistery because i think my renegade might still quit by itself like back then even before i got core patches and skinks installed but for now it looks fine...
