TeMpLaR Hey

I'm searching the beta version of the red alert 1 mod. can somebody give me the url?

thanks

Since they are not going to do it in that format, it is almost not worth downloading the large beta release package that is currently out (especially since they are going to be releasing the beta version of the expansion soon).

The address for the mod's website is: <http://renalert.arm-ent.com/>, you'll be able to read all about it here.
