NeoSaber! I'm testing these in a .mix file right now. I figured my usual .pkg test folder is so bloated and messed up I better do a fresh start.

I have the scripts file in the Renegade directory. I don't know if it means anything, but I also have the script M00_Base_Defense on the vehicle and that script works.

I'll try reinstalling the scripts or something and see if that helps.

Keep us posted.
