Goztow wrote on Wed, 11 July 2007 07:43RG tends to dc now and then from its master servers. Most Ren servers' bot has been updated to not kick you for that. However, if you are in the forcerg list (people that need to use RG), it'll kick you when that happens.

Go complain at n00bstories to get you off that list .

you dont understand... the server is let me in when i using RG the problem is the dc from RG. when RG dc the game shutdown.

ps. i can get in the server with RG as long as he work- the problem is whenhe DC....
