You should do some research on uTorrent and who bought it.

I know who bought it, and don't see the issue.

You should wonder why they bought uTorrent.

Stick with 1.6.1, For your own safety.

@Caveman: Well.. Whatever you download, Someone will know about it with 1.7.1, And not just anyone.

I see. Well tell that to the people that are using Vista. You'll find it does the exact same thing.
