Reborn wrote on Fri, 06 July 2007 04:48I am all for communities sharing information and source code. I would love to see more working together and sharing from allot of people, instead of whoring.

I find that ironic being you came from a community founded by a whoring dipshit who didn't share anything. Something your group holds pretty much true to even today.

Taking servers in goes very badly. Look at the poor excuse of a server Jelly has become. I'm not saying it isn't possible or we wouldn't/shouldn't do it. I'm just saying it wont be what people expect.
