I'm having the same problem Taximes. You need a video capture card, as long as you have the little yellow and white wires that go from your camera into the back of a VCR or TV it'll be supported. Search the web for the Radeon 7500 All-in-Wonder card. It's \$130 bucks, but triples as a video card, video capture card, and some kind of TV thing. Buy two, and send one to me .
