jonwil wrote on Mon, 09 July 2007 21:36 If you run <http://4camp.net/scripts341.exe> it will install the correct d3dx dll that is required.

alright I did that and everything works okay now... However if I turn on anti-aliasing through the game, next time i restart renegade it won't load up and gives the error 'cannot load bhs.dll'.

rend3d9 was able to use antialiasing but for some reason these scripts can't. Everything else seems to work properly though.

I have Windows Vista premium with GTX 8800
