RoShamBo wrote on Wed, 18 July 2007 07:09Needs to run Solaris 10 on 2 dedicated servers with load sharing. Both should have some sort of remote desktop EG vnc through a VPN. Each box should have one terabyte hard disks with raid. It should have 24 hour monitoring from a technician. It should have 6500+ AMD X2 processor in each box with 30Gb of RAM. All for 10 bucks a month

Good luck making a profit.
