AoBfrost wrote on Fri, 20 July 2007 05:14to make the tower all you do is spawn 50 mamies while standing in the same spot, and they fall ontop of each other.

The problem with that is that it takes so long to spawn 30 or so mammys. I only have to type one line of text and it will do it for me. Or, maybe i want to make a flight of stairs out of blockers? all i do is use the timer to create the blockers as i walk  . Only one command and you have a walk way. Soon, it will be just a key you press on your keyboard
