Subject: Dedicated Server Questions.... (repost)
Posted by aratech on Fri, 27 Jun 2003 03:10:35 GMT

I need some information about the dedicated server so my dad will let me host one off his server...

first off, where can I d/l the dedicated server? the one from the Renegade page is down....

and secondly, we have a firewall, and my dad doesn't want it compromised, if I host a dedicated server, will people be able to compromise our firewall and access our network?

thanks peeps in advance,
~Jon
