Using Brenbot, when ingame and logged in as admin: !vlimit <number here> it will change the limit for the map you're currently playing.

This obviously only works if you have the scripts to match:

As its been suggested, either upgrade to SSGM or install this:

http://www.aohost.co.uk/SSAOW1.5WFDS_ported_to_2.9.2_by_Cat998_-_BlackIntel.zip

The above applies to the server not your client. You don't need to install SSGM or these scripts on your PC.
