I have the original renegade. Updated with the latest patches. Playing online with others is very fun, but I have a friend who would play with me. The bad thing is that he has a pirate version. Yes, i know, I'm sorry about it. He won't buy the original, because he don't wants to play that game too much, just sometimes with me. Is it possible to play together online? I've heard about serial generators, but those only work if you have the original. Can we play if we installed the game with the same CD?
